

## TABLE OF CONTENTS

The table of contents is most easily created automatically (!!) with REFERENCE tools within WORD. Click on the following sequence: insert, reference, index and tables, table of contents, okay. The chapter titles and section headers should have been set to create a table of contents. It is important that the styles laid out in this template are used to maximize the benefits of the template and MS WORD options. The table of contents can be updated as you revise your thesis by using right mouse button and clicking on "update field." With this approach, there is no need to copy and paste or retype your chapter and section titles.
